Gaurav Lotekar

DevOps Engineer

Email : gauravnlotekar@gmail.com

Mobile : +91 7738683024

EDUCATION

- **Centre For Development Of Advance Computing** — Mumbai, India
  Post Graduate Diploma in Advance Computing — *Sep. 2013 – Feb. 2014*

- **Shri Shankracharya College Of Engineering** — Bhilai, India
  Bachelor of Engineering in Information Technology — *Sep. 2009 – July. 2013*

EXPERIENCE

- **SRE** — Estée Lauder
  Mindstix Software Labs — *March 2020 - Present*
  - **Azure Platform**:
    * Create and maintain fully automated CI/CD pipelines using Jenkins , Spinnaker and K8S on Azure Platform.
    * Setup an integrated tool chain for monitoring, logging, testing and analysis.
    * Encourage Dev team to follow best practices by providing reports of code analysis , container security scanning and Nexus IQ policy scanning at build time.
    * On-call support engineer in India time for any platform related issues.

- **DevOps Engineer** — InstartLogic
  Mindstix Software Labs — *March 2019 - March 2020*
  - **Data Platform**:
    * Managed in-house Data-platform built using open-source Big Data technologies.
    * Integrated Prometheus based alerting and monitoring system for the entire data-platform .
    * Using Puppet and Ansible for our IaC needs and Jenkins based CI/CD pipeline to deploy apps.
    * On-call support engineer.

- **DevOps Engineer** — VMware Inc
  Mindstix Software Labs — *Feb 2018 - March 2019*
  - **Oasis Metrics Dashboard**: Analytics dashboard built to monitor chats happening in real time with bot and live agents .
    * Created PCF based environment for deploying containerized apps.
    * Created CI/CD pipelines using vRCS(Build and Release Management tool).
    * Used Pivotal Ops Manager to configure external services to bind to containerized apps eg. Vaults, Redis, MySQL.

- **Data Engineer** — VMware Inc
  Mindstix Software Labs — *May 2017 - Jan 2018*
  - **Data center Insights Management - DCIM**:
    * Deployed Cloudera cluster and ETL pipelines to ingest and curate all the DC related data coming from various sources using PySpark , used Flask as api framework to display the data

- **Full Stack Developer**
  Ridlr.in(OLA) — *Feb 2014 - Oct 2016*
  - **Ridlr Mobile App**: Ridlr being a product based company in Transportation domain has to collect lot of data related to bus/train and respective ticketing information from various sources to be then used in the app. I worked as Software Developer building in house data pipelines to ingest data to our internal systems

SKILLS

- **Scripting**: Shell, Python
- **CI/CD**: Jenkins , Spinnaker, vRCS, GitLab CI/CD
- **Databases**: MySQL, MongoDB, Elasticsearch
- **Orchestration and Config Management**: Puppet, Cloud Foundry, Ansible, Docker
- **Monitoring and Alerting**: Prometheus, Grafana , Nagios , Pager duty
- **Big Data**: Kafka, HDFS, Spark
